About

Hello,

I'm a versatile designer, manager, developer hybrid. I pride myself on my adaptability, resourcefulness, and quick learning. With the belief that teamwork is key to success, I work flexibly, molding myself into connective tissue between clients and peers.

In my free time, I dance to keep fit and have been blooming a photography hobby over time.

Experience

Senior Product Designer

thoughtbot inc.
2020–Present

Designers at thoughtbot are a special blend of product manager, designer, and developer. I worked directly with clients, guiding their product vision all the way from ideation through to front end implementation.

Education

M.A. Web Design & Online Communication

University of Florida
2018–2019
